DETAILED ACTION

1. Applicant's Amendment filed 12/13/2005 and including drawings, which have been approved, has been reviewed and placed of record in the file.

Allowable Subject Matter

2. Claims 1-20 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record excluding that by Applicant fails to teach or render obvious a micromachined apparatus with all exclusive limitations as recited in claims 1, 11, 13, 14, 16, and 20, comprising a released microstructure disposed on a substrate; the released microstructure comprising a dielectric layer, and a conductive layer attached to the dielectric layer, wherein the conductive layer has a thickness less than $1/5$ the dielectric layer thickness, and wherein either the conductive layer is polysilicon or the released microstructure is electrically deflectable with respect to the substrate. In particular, said prior art of record teaches a released microstructure having dimensions that might overlap or cover the claimed critical thicknesses, but it does not teach the material as claimed or the function as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
